

CNC Maintenance Solutions Ltd

Stourbridge based specialist maintenance business

Client

CNC Maintenance Solutions are a relatively new company based in Stourbridge and offer many different services to support businesses and their CNC machinery.

Project

Shaun Parry, Director of the company, contacted the Black Country LEP Growth Hub team as he wanted to gain general advice and growth support for his new SME business.

Solution

The BCGH team listened to Shaun's introduction and made a referral to the in-house Experts in Residence programme.

Shaun was then matched with Devya Athwal, a respected business director with a wealth of experience in business growth, business strategy and recruitment.

Conclusion

Shaun has since completed various one to one sessions with Devya and has noted important aspects he should be focusing on as a new business. Helping CNC Maintenance to avoid common business mistakes and keep on top of their finances.

The company now aims to reach out to prospective clients, to inform them how the services provided by CNC Maintenance Solutions can reduce their costs and support their production process.

The BCLEP Growth Hub team are continuing to work with Shaun and look forward to watching the business grow.

"So far, I am incredibly happy with the support and advice from Nakkash Akbar and other members I have spoken to from the BCGH"

Shaun Parry
Director
